## OTHERS:

### 22. What is the difference between 4-digit (PIN 1) and 6-digit (PIN 2)?

- PIN 1 is any one-time four-digit number which the Sender nominate and type in when making a PaSend request. Said PIN 1 should be provided to the Beneficiary for him/her to withdraw the funds.
- PIN 2 is a system-generated six-digit number which the Beneficiary will receive via SMS for every PaSend request.

### 23. How long is the validity of the 6-digit PIN 2?

The system-generated six-digit PIN (PIN 2) is valid within 12 hours from the time of the transaction request. After 12 hours, your PaSend request and PIN 2 will no longer be accepted.

### 24. How secure is the PaSend facility?

The multi-factor authentication that comes with every PaSend transaction makes every transaction secure and reduces fraud risks.

At PSBank's instance, more information may be required of the beneficiary.

### 25. What are the benefits of the PSBank PaSend facility?

- **Low Cost Remittance.** The service provides a way for PSBank customers to transfer money at a minimal cost to relatives and friends even without a PSBank ATM card or bank account.
- **Convenience.** 24/7 access at any PSBank & Metrobank ATMs without a need for an ATM card.
- **Security.** PIN that will be used to withdraw cash in the ATM are combination of PINs provided by the sender and system generated by the Bank
