INVESTMENT OBJECTIVE AND STRATEGY

To achieve liquidity and generate income for its participants by investing in a diversified portfolio of short-term Philippine peso denominated fixed income instruments with a portfolio duration of not more than one (1) year with no investment having a term exceeding three (3) years. The Fund aims to outperform its benchmark, the Philippine 91-day Treasury Bills (net of taxes).

BENCHMARK

The benchmark used for the PSBank Money Market Fund is the Philippine 91-day Treasury bills BVAL rate. The Bankers Association of the Philippines (BAP) is the benchmark administrator and owner of the PHP BVAL Reference Rates to be used as the Philippine Peso Government Securities benchmark in the GS market. The PHP BVAL Reference Rates are solely calculated by Bloomberg Finance Singapore L.P. and/or its affiliates (Bloomberg), under an agreement with the BAP. The BAP has engaged the Philippine Dealing System (PDS) to be its Benchmark Publication Agent and the BVAL rates for Government Securities are published on the PDS website daily at 5:00 p.m.

Additional information on the BVAL rates can be found on the PDS website (www.pds.com.ph)

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust Fund Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

Suitable for individual and corporate investors with moderately conservative risk appetite.

KEY RISKS AND RISK MANAGEMENT

Investment in UITF exposes the investors to various types of risks including but not limited to:

- **Interest Rate Risk** : This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk** : This is the possibility for an investor to experience losses due to changes in market prices of securities (e.g., bonds and equities). It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk** : This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.
- **Credit Risk/Default Risk** : This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.
- **Reinvestment Risk** : This is the risk associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.
- **Other Risk** : Your participation in the UITFs may be further exposed to the risk of any actual or potential conflicts of interest in the handling of in-house or related party.

PSBank Money Market Fund uses a defined Risk Management policy in identifying and measuring level of risks. The Fund uses weighted modified duration in evaluating market risk for investment in fixed income securities. Modified Duration measures the approximate sensitivity of the value of the security to changes in interest rates. Interest rates have an adverse relationship with fixed income security prices so that an increase in interest rates generally leads to decrease in fixed income prices and vice versa. The higher the duration of an instrument, the higher its risk (considering all other factors are equal).

○THE UITF FUND IS NOT A DEPOSIT ACCOUNT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC)
○THAT DUE TO THE NATURE OF THE INVESTMENT OF A UITF, THE RETURNS/YIELDS CANNOT BE GUARANTEED, HISTORICAL PERFORMANCE WHEN PRESENTED IS PURELY FOR REFERENCE PURPOSES AND IS NOT A GUARANTEE OF SIMILAR FUTURE PERFORMANCE
○THAT ANY LOSSES AND INCOME ARISING FROM MARKET FLUCTUATIONS AND PRICE VOLATILITY OF THE SECURITIES HELD BY THE UITF, EVEN IF INVESTED IN GOVERNMENT SECURITIES, ARE FOR THE ACCOUNT OF THE CLIENT. AS SUCH, THE UNITS OF PARTICIPATION OF THE CLIENT IN THE UITF WHEN REDEEMED, MAY BE WORTH MORE OR WORTH LESS THAN HIS/HER INITIAL INVESTMENT CONTRIBUTION.
○THE TRUSTEE IS NOT LIABLE FOR LOSSES UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE
○THAT THE INVESTOR MUST READ THE COMPLETE DETAILS OF THE FUND IN THE UITF'S PLAN, MAKE HIS/HER OWN RISK ASSESSMENT, AND WHEN NECESSARY, SEEK AN INDEPENDENT/ PROFESSIONAL OPINION BEFORE MAKING AN INVESTMENT
○THE UITF FUND IS NOT AN OBLIGATION OF, NOR GUARANTEED, NOR INSURED BY THE TRUSTEE OR ITS AFFILIATES OR SUBSIDIARIES

COOLING-OFF PERIOD

Subject to exemptions under BSP regulations governing the mandatory cooling-off period, the TRUSTOR/s is/are entitled to a cooling off period of two (2) banking days from the date of initial participation (the "Cooling-Off Period") in the applicable FUND. Should the TRUSTOR/s decide(s) to avail of their right to Cooling-Off period, the TRUSTOR/s shall give the TRUSTEE/MANAGER a written notice to cancel within such 2-banking day period. In which case, the TRUSTEE/MANAGER shall refund or return to the TRUSTOR/s the amounts invested, including the documents submitted, without undue delay and within a maximum period of fifteen (15) banking days after receipt of such notice to cancel and shall charge and withhold from said refund such processing fees or charges that are not greater than the actual or reasonable approximation of administrative costs incurred by the TRUSTEE as recovery thereof. As a result of the cancellation, the TRUSTOR/s understand(s) that such a cancellation may also result in mark to market gain or loss depending on the prevailing NAVPU which shall be for the TRUSTOR/s' own account. Otherwise if the TRUSTOR/s fail to exercise such a right within the said Cooling-Off period, the cancellation of investment beyond which shall be treated as a normal redemption subject to the applicable early redemption penalty.

OUTLOOK AND STRATEGY

Yields on government securities increased by 20 bps on average month-on-month with the 91-day T-bills closing at 5.64% up by 32 bps from last month. Meanwhile, the 5-yr, 7-yr and 10-yr papers were up by 20 bps, 18 bps and 12 bps respectively as market players reduce their inventories amid expectations of higher inflation in November. The Fund's 30-day and year-to-date absolute performance were 0.374% and 4.245% vs. benchmark of 0.368% and 4.179% respectively, while the Fund's duration stood at .08 years. Headline inflation in November rose to 2.5% from 2.3% in October. This is in line with consensus forecast of 2.5% and within the BSP's target range for inflation of 2.0-4.0%. This brings the average headline inflation from Jan-Nov 2024 to 3.2%. Meanwhile, core inflation in November rose slightly to 2.5% from 2.4% in October. The higher headline inflation figure was mainly due to faster growth in prices of the food and non-alcoholic beverages sector amid food supply issues due to weather disturbances.

The US Federal Reserve cut interest rates by 25bps during its policy meeting last November. The Fed said that conditions have generally eased, the unemployment rate has moved up but remains low, and the economy has continued to expand at a solid pace. For the final FOMC meeting in December, the Fed may decide to cut rates again but Fed Chair Powell cautioned that the Fed is not in a rush to cut rates quickly. Meanwhile, after cutting rates by 25bps last October, the Monetary Board may also cut rates again during the final MB meeting in December. BSP Gov. Remolona said that we're still in the easing cycle, either we cut in December, or we cut in the next meeting, but gradually. However, he also stated that the Monetary Board may decide to keep rates steady due to inflationary pressures and that any move will depend on the latest data. Gov. Remolona also cautioned that risks to the inflation outlook remain from higher oil prices due to geopolitical conflicts in the Middle East, food supply issues due to weather disturbances, higher utility rates, and higher import costs due to a weaker Peso. Looking ahead, a shift to a looser monetary policy may cause domestic interest rates to decline which, in turn, may lead to higher mark-to-market values in the short-term. As such, we will continue to monitor foreign and local economic developments to take advantage of any market opportunities. The Fund will continue to seek high yielding deposit/ fixed income securities to provide greater accruals to the Fund.
